

# Better Training With Virtual Driver Interactive

# HARDWARE

## Desktop Units

### VT Touch

The VT Touch is the most portable, scalable and flexible virtual trainer on the market. It includes a touch-screen all in one computer, a gaming wheel and foot pedals. Used with VDI's portability package, the VT Touch makes transportation and storage effortless.

\*The VT Touch currently only runs OSD. Table not included.

## All-Inclusive Units

### LX Series

The LX series combines the realistic feel of a car seat and seat belt with the more affordable cost of durable desktop components. Customers may choose from the LX29 (wide 29" screen) and the LX38 (extra wide 38" screen).

### dVT Series

Also known as the desktop trainer, the dVT series includes our most affordable trainer and like the LX series offers the only single-screen monitor on the market with a full field of view.

#### Display Options

- dVT3 - three 20" screens
- dVT29 - wide 29" screen
- dVT38 - ultra wide 38" screen

Table not included.

### NDX306

The NDX306 is designed for the driver training program that demands the realistic look and feel of authentic car components.

## WARRANTY

All Virtual Driver Interactive trainers are backed by our industry-leading support and full warranty.

# SOFTWARE

## Behavior Modification

**ONE  
SIMPLE  
DECISION**

**Distracted & Impaired  
Driving Deterrent**

One Simple Decision™ (OSD) is the first simulation-based distracted & impaired driving deterrent. It reduces destructive decisions made behind the wheel by immersing young drivers into real-world consequences. Students “live through” consequences including arrest, jail intake, emergency room treatment, and court. OSD was created with the direct participation of law enforcement, judicial and trauma personnel.

Simulated distracted drive with  
trauma life flight rescue video

## Skills-Based Training

**STREETREADY**  
for new drivers

The StreetReady™ curriculum was designed in partnership with ADTSEA to teach critical driving skills to new drivers.

**VIRTUALDDC**  
for experienced drivers

The virtual defensive driving course, designed by National Safety Council, teaches and reinforces defensive driving skills for experienced drivers.

Skills-based training includes:

- Multimedia examples
- Retention & concept testing
- Driving in various weather and lighting conditions
- Responding to vehicle failures
- Developing visual processes and searching skills
- Practice & assessment drives
- Comprehensive assessment reports

### ASSESSMENT and REPORTING

Both skills-based programs include iPASS™, VDI's comprehensive scoring system. While other vendors limit assessments to a simple pass/fail report, iPASS™ is a complete program, scoring drivers on up to 80 critical skills per second. iPASS™ allows instructors to set baseline scores and monitor achievements -- all via a numeric scoring system.

# Why Virtual Training?

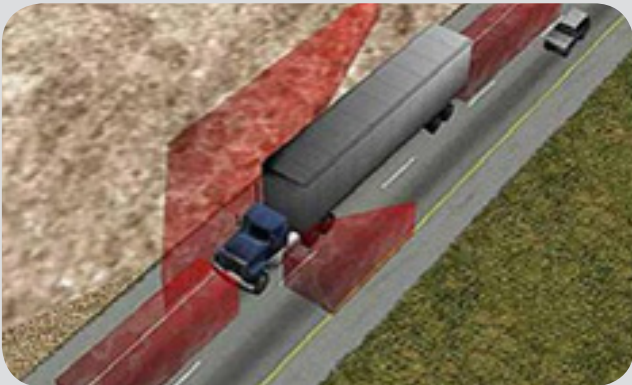

Virtual training is more than just simulation. It is a progressive learning method that combines leading-edge graphics with nationally recognized curriculum and durable components to provide the most effective learning experience possible.

## Virtual training:

- Saves money and lives
- Allows drivers to experience dangerous situations in a safe environment
- Provides better retention than conventional teaching

When training an entire class, VDI's single-screen trainers are the only trainers on the market that can project a full screen view, allowing all students to participate in the experience simultaneously.

## Skills-based training visual cues

## One Simple Decision™ simulated impaired drive with arrest consequence scene

Behaviors change through experience. The hands on, personal experience of OSD (One Simple Decision™) gives young drivers a safe environment in which to live through the severe consequences of driving distracted or impaired.

## OSD includes:

- Distracted & impaired driving
- "Live" texting
- Reality Check videos
- First-person consequence videos including:
  - Arrest, jail, trauma response and court
- Pre- and post-drive survey
- Customization & branding
