

## **Virtual Driver Interactive's Awarded Competitive General Services Administration (GSA) Contract Has Been Extended**

*Contract Allows Virtual Driver Interactive to Provide its Driver Training/Safety Systems to Federal Government Agencies*

El Dorado Hills, Calif.—October 1, 2019—Virtual Driver Interactive (VDI), provider of engaging and compelling simulation systems for all aspects of driver safety, announced its awarded contract from the GSA has been extended a second time. VDI's contract number is GS-02F-0122W and is listed under the category - Mission Oriented Business Integrated Services (MOBIS). The contract will remain in effect until February 18, 2020 with an additional five-year extension possible.

The GSA contract leverages the incredible buying power of the United States Federal Government in order to negotiate more simplified contracts with commercial entities. Under the contract, government agencies will be able to procure VDI's driver training and safety systems easily and cost effectively. The GSA contract simplifies government agencies' access to products by eliminating exhaustive competitive pricing and contracting procedures, allowing vendors to focus their efforts on providing customers with the best solutions. The GSA contains pre-negotiated prices, delivery terms, warranties, and a host of other terms and conditions.

Recent customers taking advantage of GSA contract pricing include US Postal Service, Ft Rucker/US Army Readiness Center, Lackland AFB, San Diego Job Corp, Ft Hood, Curlew Job Corp, Georgia National Guard, USMC - Marine Corp Air Force, Eielson AFB and more.

“VDI's driving simulators have proven to be a cost-effective and engaging way to provide refresher training before and after accidents to our Postal Carriers and Tractor/Trailer Operators”, said Andrea Maddicks, Manager Transportation & Networks, US Postal Service/Suncoast District. “More importantly, the simulation-based driver safety training has considerably reduced accident rates in the Suncoast District during our trial period compared to the same period last year. In fact, we have had only one backing accident since we got the simulator in Tampa compared to last year when there were 26!”

### About GSA

GSA's acquisition solutions offer private sector professional services, equipment, supplies, telecommunications, and information technology to government organizations and the military. GSA policies promote management best practices and efficient government operations.
